About Us

Commercial Technology Solutions, Commercial Telephone Systems

For over **40 years**, Commercial Telephone Systems has been providing communications solutions and services to businesses in Missouri, Illinois and throughout the United States. During that time CTS has satisfied thousands of customers by meeting their specific needs one customer at a time.

Commercial Telephone Systems offers a wide array of products from Avaya, ESI Communications Servers, Partner ACS, Engenius, Nortel, Norstar, Win, and other major manufacturers. Communication is at the core of most organizations and virtually all of the products that we have chosen to represent are designed to allow you to communicate more efficiently.

A decade ago the mobile phone was not a necessity for the majority of professional individuals. Today we are often lost without them. We feel that many of the products that we represent will be viewed in the same light once you begin to utilize them. Please consider our products and allow us to propose a solution customized to your environment.
